

VALID PARENTHESES

CHALLENGE DESCRIPTION:

Given a string comprising just of the characters (,),{,},[,], determine if it is well-formed or not.

INPUT SAMPLE:

Your program should accept as its first argument a path to a filename. Each line in this file contains a string comprising of the characters mentioned above. E.g.

```
()  
([])
```

OUTPUT SAMPLE:

Print out True or False if the string is well-formed. E.g.

```
True  
False
```
