

## LONGEST WORD

### CHALLENGE DESCRIPTION:

In this challenge you need to find the longest word in a sentence. If the sentence has more than one word of the same length you should pick the first one.

### INPUT SAMPLE:

Your program should accept as its first argument a path to a filename. Input example is the following

```
some line with text
another line
```

Each line has one or more words. Each word is separated by space char.

### OUTPUT SAMPLE:

Print the longest word in the following way.

```
some
another
```
