

LOWERCASE

CHALLENGE DESCRIPTION:

Given a string write a program to convert it into lowercase.

INPUT SAMPLE:

The first argument will be a path to a filename containing sentences, one per line. You can assume all characters are from the english language. E.g.

```
HELLO CODEEVAL
This is some text
```

OUTPUT SAMPLE:

Print to stdout, the lowercase version of the sentence, each on a new line. E.g.

```
hello codeeval
this is some text
```
