

MORSE CODE

CHALLENGE DESCRIPTION:

You have received a text encoded with Morse code and want to decode it.

INPUT SAMPLE:

Your program should accept as its first argument a path to a filename. Input example is the following:

```
.- .-.- .-.-. -.- ..... . . -.-. -.-. ....- .....  
-... ..... -.-
```

Each letter is separated by space char, each word is separated by 2 space chars.

OUTPUT SAMPLE:

Print out decoded words. E.g.

```
AV2WHIECX 45  
BH3
```

You program has to support letters and digits only.
