SUM TO ZERO

CHALLENGE DESCRIPTION:

You are given an array of integers. Count the numbers of ways in which the sum of 4 elements in this array results in zero.

INPUT SAMPLE:

Your program should accept as its first argument a path to a filename. Each line in this file consist of comma separated positive and negative integers. E.g.

```
2,3,1,0,-4,-1
0,-1,3,-2
```

OUTPUT SAMPLE:

Print out the count of the different number of ways that 4 elements sum to zero. E.g.

```
2
1
```

SUM TO ZERO

CHALLENGE DESCRIPTION:

INPUT SAMPLE:

```
2,3,1,0,-4,-1
0,-1,3,-2
```
